Contents of Volume 23

Number 1

1 Valorisation des Tubercules de Topinambour par Hydrolyse Enzymatique
M. EL YACHIOUI, N. EL HALLOUI (Morocco) & R. VILLA (France)

21 Statistical Method to Evaluate the Critical Reynolds Number for Pseudoplastic Fluids in Tubes
D. T. CAMPOS, J. F. STEFFE & R. Y. OFOLI (USA)

33 Prediction of Hot-Fill–Air-Cool Sterilization Processes for Tomato Paste in Glass Jars
A. J. SANDOVAL, J. A. BARREIRO & S. MENDOZA (Venezuela)

51 Biological Validation of Mathematical Modeling of the Thermal Processing of Particulate Foods: The Influence of Heat Transfer Coefficient Determination
D. CACACE, L. PALMIERI, G. PIRONE, G. DIPOLLINA, P. MASI & S. CAVELLA (Italy)

69 A Two-Stage Model for On-Line Estimation of Freezing Time of Food Materials: A One-Dimensional Mathematical Model Which Has Analytical Solutions
T. MIHORI & H. WATANABE (Japan)

91 Shrinkage During Drying of Foodstuffs
C. RATTI (Argentina)

107 Electrohydrodynamic (EHD) Drying of Potato Slabs
Y. CHEN, N. N. BARTHAKUR & N. P. ARNOLD (Canada)

121 A Study on Diffusion of Water by the Soybean Grain During Cold Water Soaking
S. D. DESHPANDE, S. BAL & T. P. OJHA (India)

Number 2

129 The Thin-Layer Drying Characteristics of Macadamia In-shell Nuts and Kernels
K. B. PALIPANE & R. H. DRISCOLL (Australia)

145 Mass Transfer Studies in Batch Fermentation: Mixing Characteristics
M. N. AHMAD, C. R. HOLLAND & G. MCKAY (UK)

159 Drying and Infusion During the Traditional Processing of Kilishi
P. MUSONGE & E. N. NJOLAI (Cameroon)

169 Liquid-to-Particle Convective Heat Transfer in Non-Newtonian Carrier Medium During Continuous Tube Flow
V. M. BALASUBRAMANIAM & S. K. SASTRY (USA)

189 Optimization of Air Drying of Foods
J. R. BANGA & R. P. SINGH (USA)

213 Mechanical Aspects of Gas Dispersion in Continuous Foaming Food Processes using Scraped Surface Heat Exchangers
G. DJELVEH, O. BACATI & J. B. GROS (France)

Research Note

225 Mathematical Analysis of Lye Peeling of Tomatoes
L. BAYINDIRLI (Turkey)

Technical Note

233 Pressure Losses Calculation in Continuous Heat Exchangers for Tomato Paste
A. TRIFIRÒ, F. PAGLIARI & S. GHERARDI (Italy)

249 Book Review

Number 3

251 Editorial

253 Measurement of Young Coconut (*Cocos nucifera*, L.) Maturity by Sound Waves
M. M. GATCHALIAN, S. Y. De LEON (Philippines) & T. YANO (Japan)

277 Heat and Mass Transfer during Beef Carcass Chilling—Modelling and Simulation
P. MALLIKARJUNAN & G. S. MITTAL (Canada)

293 Application of Z Transfer Functions to Heat or Mass Transfer Problems: Their Calculation by Numerical Methods
V. O. SALVADORI (Argentina), P. D. SANZ (Spain),
M. DOMÍNGUEZ ALONSO (Spain) & R. H. MASCHERONI (Argentina)

309 Shrinkage, Density and Porosity of Garlic during Drying
P. S. MADAMBA, R. H. DRISCOLL & K. A. BUCKLE (Australia)

321 Study of the Bread Baking Process—II. Mathematical Modelling
B. ZANONI, S. PIERUCCI & C. PERI (Italy)

337 A Computer Simulation of the Dynamics of Bubble Growth and Shrinkage during Extrudate Expansion
J. FAN, J. R. MITCHELL & J. M. V. BLANSHARD (UK)

357 An On-Line Method for Predicting Freezing Time Using Time/Temperature Data Collected in the Early Stages of Freezing
T. MIHORI & H. WATANABE (Japan)

375 Modelling and Design of Conveyor Belt Dryers
C. T. KIRANOUDIS, Z. B. MAROULIS & D. MARINOS-KOURIS (Greece)

Technical Note

397 Change in Massecuite during Mixing in a Cameroonian Cane Sugar Factory
C. KAPSEU, P. AYONG & N. TEDGA (Cameroon)

Number 4

403 Modeling and Process Control of Twin-Screw Cooking Food Extruders
B. SINGH & S. J. MULVANEY (USA)

429 The Analysis and Calculation of the Efficiency of a Homogenizing Valve
L. A. ROVINSKY (Russia)

449 Cleanability of Stainless Steel in Relation to Chemical Modifications due to Industrial Cleaning Procedures Used in the Dairy Industry
M.-N. LECLERCQ-PERLAT, J.-P. TISSIER & T. BENEZECH (France)

467 Vapor Pressure of Fatty Acid Esters: Correlation and Estimation
V. K. MISHRA, F. TEMELLI & B. OORAIKUL (Canada)

481 Viscoelastic Properties of Raisins
V. T. KARATHANOS, A. E. KOSTAROPOULOS & G. D. SARAVACOS (Greece)

491 Research Directions for Food Engineering
R. K. SINGH (USA)

501 Cleanability in Relation to Surface Chemical Composition and Surface Finishing of Some Materials Commonly Used in Food Industries
M.-N. LECLERCQ-PERLAT & M. LALANDE (France)

519 Examination of the Usefulness of Empirical Kinetic Equations for Describing the Formation of 5-HMF in Grapefruit Juice
I. KÖRMENDY, Gy. PÁTKAI, J. SÉNYI & B. GION (Hungary)

533 Moisture Diffusion in a Dry Soybean Seed Measured Using Pulsed-Field-Gradient NMR
M. FUKUOKA, H. WATANABE, T. MIHORI & S. SHIMADA (Japan)

543 Energy Consumption of Absorption-Driven Multiple-Effect Evaporators
S. YANNIOTIS (Greece) & P. A. PILAVACHI (Belgium)

555 Experimental Investigation of Static Drainage of Protein Stabilized Foams—Comparison with Model
R. J. GERMICK, A. S. REHILL & G. NARSIMHAN (USA)

579 Rheological and Textural Behaviour of Double Cream Cheese. Part I: Effect of Curd Homogenization
C. SANCHEZ, J.-L. BEAUREGARD, M.-H. CHASSAGNE, J.-J. BIMBENET & J. HARDY (France)

595 Rheological and Textural Behaviour of Double Cream Cheese. Part II: Effect of Curd Cooling Rate
C. SANCHEZ, J.-L. BEAUREGARD, M.-H. CHASSAGNE, A. DUQUENOY & J. HARDY (France)

Research Notes

609 Further Enthalpy Values of Foods Measured by an Adiabatic Calorimeter
D. T. LINDSAY & S. J. LOVATT (New Zealand)

621 Heat Transfer in Canned Foods Undergoing Agitation
R. B. PRICE & S. R. BHOWMIK (USA)

631 Diffusivity Data of an Artificial Food System
A. P. ANDERSSON & R. E. ÖSTE (Sweden)
